

BARONESS

“The cutting quality of the greens, tees, approaches, and collars are great. I truly like the quality of the cut and am impressed with the groomers.”

Candice Combs, Golf Course Superintendent
Torrey Pines Golf Course, San Diego, CA

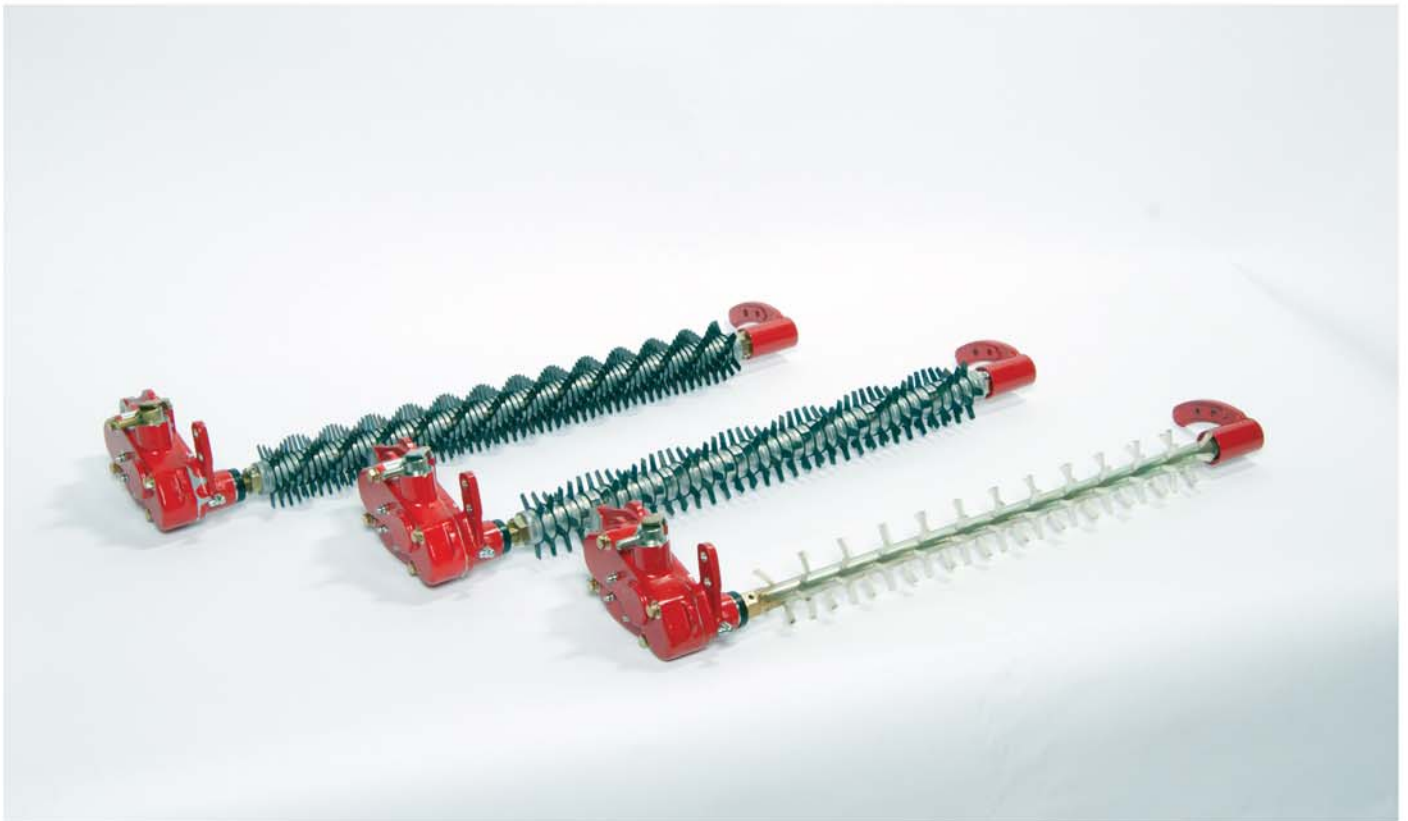

“In the last two months, all I did was check the cutting height and grease it once a week. It cuts great and the groomer effect is excellent.”

Glenn Torio, Equipment Technician
Torrey Pines Golf Course, San Diego, CA

What others are saying...

- Easy fingertip control of the throttle and clutch.
- Precise cutting quality without scalping the green.
- Changing the reel and bedknife was so simple, not to mention the reel and the bedknife held the edge a lot longer than other brand's.
- Great maneuverability.

Helpful Tips from Us

Effective use of the Groomers:

Prior to Topdressing, Use the de-thatcher attachment to lightly verti-cut the green.

First Week After Topdressing, Use the brush to help work excess sand into the putting surface.

Second Week After, Back to the Regular Groomer. Set at Between 40/1000"-160/1000"
